SUMMARY

CTO and Flutter engineer with 7+ years of shipping production software, from the apps people hold to the cloud behind them. Built Shpper's cross-border marketplace from the ground up and have led it as CTO since 2024; before that, CTO at Winning Bees across nine consumer apps. Maintain 14 open-source Dart and Flutter packages, every one at the maximum 160/160 pub points, and nine VS Code extensions. Work across Flutter, Firebase, Google Cloud and AWS, native Swift and Kotlin plugins, CI/CD and on-device AI.

EXPERIENCE

Shpper — cross-border personal-shopping marketplace Jul 2023 – Present

Shpper Software Design FZCO · Dubai, UAE

Chief Technology Officer Mar 2024 – Present

Freelance Flutter Developer Jul 2023 – Feb 2024

- Built the marketplace from the ground up: Flutter apps for buyers and travellers on iOS and Android, the backend and the release pipeline, first released on the App Store in July 2023.
- Own the platform end to end as CTO: both sides of the marketplace, payments and escrow, identity verification and every release.
- Designed escrow as the trust mechanism between two strangers: funds are held from agreement until delivery is confirmed, and identity verification makes the hold meaningful.

Stack: Flutter, Dart, Firebase, payments, identity verification, iOS, Android

Founder & CEO — Jumyn 2026 – Present

Direct-to-consumer full-grain leather goods · Dhaka, Bangladesh

- Founded a leather goods brand selling bags, wallets, belts and jackets direct to customers, and own its product, technology and brand.
- Built the multilingual Next.js storefront and the operations behind it: catalogue and inventory, prepaid delivery and returns, and the release and content workflow.

Stack: Next.js, Firebase, e-commerce

Chief Technology Officer — Winning Bees Jun 2022 – Feb 2024

Atlanta, USA · remote from Dhaka

- Led engineering for a portfolio of nine consumer Flutter apps: IslamicBrain, QRMate, BeeHappy, PDFBee, BudgetMate, QuitSmart, BMIBees, AlphaAthena and FasterBrain.
- Shipped on-device PDF processing (merge, split, compress), offline-first finance across several budgets, a spaced-repetition scheduler, uninterrupted background audio for guided meditation, and prayer-time calculation with streaks, widgets and a leaderboard.

Stack: Flutter, Dart, offline-first storage, audio, notifications, Android, iOS

Mobile App Developer — Incevio Jun 2021 – May 2022

Dhaka, Bangladesh

- Built the Flutter apps for zCart, a commercial white-label multi-vendor marketplace sold on CodeCanyon: the customer storefront, the Seller Central vendor console and the courier Delivery app.
- Built mio amore, a commercial Flutter dating app with profile verification, preference-based discovery, swipe matching and real-time chat with media.

Stack: Flutter, Dart, REST APIs, real-time chat, maps, white-label builds

Freelance & Contract Engineer 2022 – 2026

- **Great Technical** (2025–2026): aTownRides, community ride-sharing rider and driver apps with live trip tracking and upfront fares; gInvoice, an offline-first estimates and invoicing app with PDF generation.

- **Al Ghassil Althathi** (2024): Sashly, a Saudi on-demand laundry service. Two Flutter apps, a customer app with full Arabic RTL and a courier app, plus the Firebase backend, Cloud Functions, security rules and the migration of the business onto it.
- **VenuFinder** (2024): venue discovery and booking app, built end to end.
- **Quest Properties India** (2022): Quest Mall, the offers, directory and loyalty app for a Kolkata retail destination.
- Also: BidForSale, a peer-to-peer luxury resale marketplace with bidding; a bilingual English and Arabic practice website for a Dubai orthopaedic surgeon.

OPEN SOURCE & PRODUCTS

- **14 Dart and Flutter packages** on pub.dev (publisher jumyn.com), all at 160/160 pub points. Includes platform bindings written in Swift and Kotlin for Apple Foundation Models, Apple Intelligence, RoomPlan, AR Quick Look and health data, and macos_grants for macOS permissions and code-signature checks.
- **9 VS Code extensions** on the Visual Studio Marketplace: ds_rules, a security linter for Firestore and Storage rules; ds_usage, Claude usage limits in the status bar; and a family of seven themes with contrast measured at build time.
- **Helm**: a free, open-source macOS toolkit, fifteen utilities in one Flutter app, MIT licensed.
- **devshakib.jumyn.com**: a Flutter web platform with 150+ technical articles, 98 in-browser tools, 32 games and an apps store, run on Firebase for \$0 a month.

SKILLS

Mobile & front end	Flutter, Dart, Riverpod, Bloc, Swift and Kotlin platform plugins, Next.js, UI/UX and design systems
Backend & cloud	Firebase (Firestore, Auth, Cloud Functions, Hosting, Storage), Google Cloud Platform, AWS, Node.js, TypeScript, Python, REST API design
DevOps & quality	CI/CD, GitHub Actions, Docker, Kubernetes, Git, automated testing
AI	On-device models (Apple Foundation Models), LLM-powered features, agentic coding
Architecture & leadership	System architecture, security and auth, data modelling (SQL and NoSQL), team leadership, product and startup strategy

EDUCATION & CERTIFICATIONS

B.Sc. Software Engineering · Yangzhou University, China · 89% score	2017 – 2021
• Expert in Git and GitHub · Coursera · 2021	
• Expert in Algorithms and Data Structures · Coursera · 2021	
• International A Level, 3 A grades · Edexcel · 2017	

RECOMMENDATIONS

"He single-handedly constructed everything from the ground up, and now we are experiencing growth after a few years of operation."
Khalid al Qasim, CEO, Shpper
"His exceptional skills and expertise have made him a true asset to our team."
Mahesh Gupta, MD & CEO, Lee & Nee Softwares (Exports) Ltd
"He is the most exceptional developer we have had for Incevio."
Munna Khan, Founder, Incevio
